

BENEFITS OF FILTREX

Innocule's Value Proposition

- **Proprietary Chemicals** developed in-house
- **Easy application** with no change to plant layout
- **On-site dosing** - Service team deployed along with dosing equipment
- **Work closely with plant's operation team** to minimize their effort on efficiency and focus on core operation

Advantage to Clients

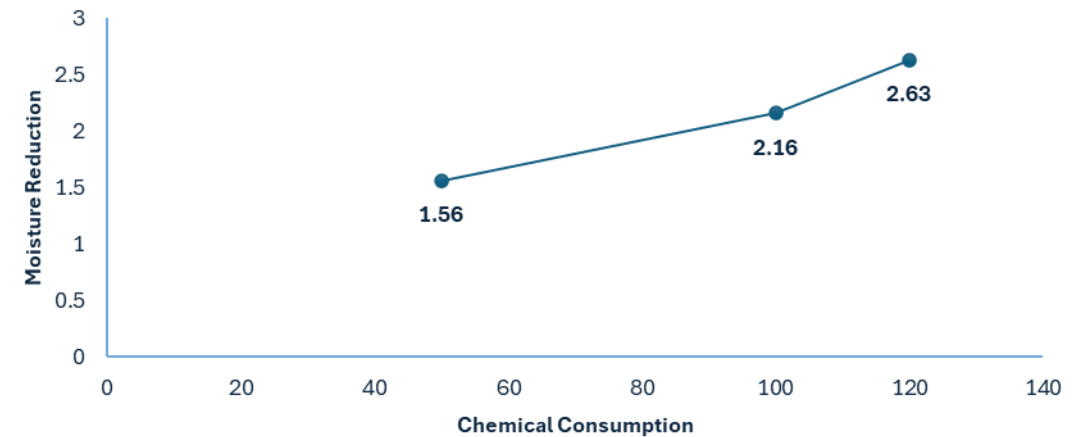

- **Process low-grade ores** cost effectively
- **Increase plant's capacity** by 10 to 30% (few unit operations)
- **Cost benefit** in using Innocule vs incurring cost due to inefficiency
- **Specific products for specific operational challenges**

FILTREX CASE STUDY

Iron ore concentrate

Chemical	Dosage (GPT)	Cycle Time (mins)	Avg Moisture (%)	Moisture Reduction (%)
Blank	0	26	14.58	-
Filtrex 320	50	26	13.02	1.56
	100	26	12.42	2.16
	120	26	11.95	2.63

Chemical Dosage(GPT) vs Moisture Reduction (%)

Without Filtrex

With Filtrex
