## Product Data Sheet

### Product – KWIK SEAL

#### PRODUCT DESCRIPTION:

**KWIK SEAL** is a combination of flakes, granules, and fibres design to primarily to stop lost circulation in a wide range of conditions with water base drilling fluids, available grades are fine, medium, and coarse.

#### TYPICAL PHYSICAL PROPERTIES:

Appearance	Mixture of Flakes, Granules & Fibrous
Odour	Odourless

#### APPLICATIONS:

**KWIK SEAL** is a mixture of Flakes, Granules & Fibrous it normally uses to control and eliminate of loss circulation due to fractures, highly permeable zones, and broken unconsolidated formation.

**KWIK SEAL** is quite effective than other loss circulation products in sealing loss zones,

**KWIK SEAL** Coarse grade is recommended for sealing of large-Scale fractures, and highly permeable formations and can be pumped easily through large jet or open pipe.

**KWIK SEAL** Medium grade is used to sealing medium fracture or some time fine fractures and porous zones and can be used with most jet bits.

**KWIK SEAL** Fine grade is used where seepage losses problem occurred such as fine fractures or porous formations, it can be used through coarse Mesh Shaker screen.

#### ENVIRONMENTAL INFORMATION:

For information concerning environmental regulation applicable to **KWIK SEAL**, Contact the Health Safety and Environmental Department.

#### SHIPPING:

Transportation of Commodity name is not restricted by either international or INDIA regulatory Agencies.

#### SAFE HANDLING RECOMMENDATIONS:

Utilize normal precautions for employee protection when handling chemical products. Use of standard PPE is recommended for employee comfort and safety.

See material safety data sheet (MSDS) prior to use.

#### PACKING:

**KWIK SEAL** is packaged in 25 KG HDPE Laminated paper bags.
